

MUSKAN KARNANI

Senior Developer

+91 9166316817 • karnanimuskan7@gmail.com • www.linkedin.com/in/muskan-karnani

SUMMARY

Senior Java Developer with 5+ years of experience in Java, Spring Boot, REST APIs, Microservices, and Oracle SQL. Skilled in backend engineering, application modernization, CI/CD, and production support within Agile enterprise environments. Experienced in building scalable and high-performance applications across banking and financial systems.

WORK EXPERIENCE

Senior Software Engineer, HSBC

11/2023 – Present

- Led modernization of legacy reporting platform to microservices architecture, improving scalability and **system performance by 40%** while enabling decommissioning of vendor-based IBM reporting platform
- Designed and developed an in-house Swagger/OpenAPI-based reporting and business rule validation solution to replace dependency on the legacy vendor tool, reducing operational costs and increasing platform flexibility
- Conducted architecture analysis and designed an AWS S3-based storage solution to eliminate Oracle database dependency, enabling dynamic report generation and business calculations from input files
- Architected and executed upgrade from **Java 8 to Java 21** along with modernization of Spring 2.x services, **reducing technical debt by 30%** and enabling faster and more secure feature delivery
- Redesigned and migrated a Python-based trade data processing utility to Java 21, **reducing processing time by 50%** and improving reliability, maintainability, and integration with enterprise systems
- Led Agile delivery activities including sprint planning, technical design discussions, and code reviews, **improving release cycle speed by 25%**
- Authored technical design documents and operational runbooks to support maintainability and knowledge transfer
- Managed production support and BAU activities, **maintaining 99.9% system uptime** and resolving critical performance bottlenecks

Software Engineer, HSBC

09/2020 - 11/2023

- Delivered an in-house Wolf Management System (WMS) to **replace the vendor product** Fircosoft Business Utilities using Java, Spring Boot, and Angular, improving maintainability and operational control
- Enhanced WMS functionalities including audit logging, deployment scheduling, and server refresh modules, improving operational efficiency and user experience
- Revamped and optimized a cross-regional data extractor, improving performance and enabling efficient data retrieval across multiple database sources
- Built RESTful web services using Spring Boot and Node.js within a microservices architecture to support scalable backend integrations
- Managed CI/CD deployments using Jenkins and Ansible, ensuring seamless integration, automation, and reliable releases
- Provided production support and system monitoring using E2 and Control-M, ensuring operational stability and timely resolution of critical issues

Project Intern

2019

- Developed an underwater object detection system using depth images obtained from Microsoft Kinect V2
- Applied background subtraction and k-means clustering algorithms to remove noise and predict object trajectories from depth image data

Key Achievements

- Processathon Winner (2025) - Built an ICE score validation feature eliminating dependency on legacy internal APIs
- HackForGood Participant (2023) - Developed a language translator processing utility
- Enterprise Engineer Program (EEP), HSBC (2023)
- HerHack Winner (with Google, 2023) - Developed an AI-powered MoM platform using cloud services, Python, and Angular
- Google Cloud Associate Cloud Engineer (2024)

Skills

Java • Spring Boot • REST APIs • Microservices • Oracle SQL • AWS S3 • Node.js • Angular • TypeScript • HTML/CSS • Jenkins • GitHub • Linux • Shell Scripting • CI/CD • Agile • Production Support • System Design

Education

Banasthali Vidyapith	2020	Lucknow Public School	2016
Bachelor of Technology in Computer Science	8.43	Senior and Higher Secondary (ISC)	96%
