

MUSKAN KARNANI

Senior Java Developer

+91 9166316817 | karnanimuskan7@gmail.com | linkedin.com/in/muskan-karnani

Professional Summary

Senior Java Developer with 5+ years of experience in Java, Spring Boot, REST APIs, Microservices, and Oracle SQL. Skilled in backend engineering, application modernization, CI/CD, and production support within Agile enterprise environments. Experienced in building scalable and high-performance applications across banking and financial systems

Technical Skills

Java • Java 21 • Spring Boot • Spring Framework • REST APIs • Microservices • Oracle SQL • AWS S3 • Node.js • Angular • TypeScript • HTML/CSS • Jenkins • GitHub • Linux • Shell Scripting • CI/CD • Agile • Production Support • System Design

Experience

HSBC

Senior Software Engineer

Pune, India

Nov 2023 – Present

- Led modernization of a legacy reporting platform to a microservices architecture, improving scalability and system performance by 40% while enabling decommissioning of the vendor-based IBM reporting platform
- Designed and developed an in-house Swagger/OpenAPI-based reporting and business rule validation solution to replace dependency on the legacy vendor tool, reducing operational costs and increasing platform flexibility
- Conducted architecture analysis and designed an AWS S3-based storage solution to eliminate Oracle database dependency, enabling dynamic report generation and business calculations from input files
- Architected and executed upgrade from Java 8 to Java 21 along with modernization of Spring 2.x services, reducing technical debt by 30% and enabling faster and more secure feature delivery
- Redesigned and migrated a Python-based trade data processing utility to Java 21, reducing processing time by 50% and improving reliability, maintainability, and integration with enterprise systems
- Led Agile delivery activities including sprint planning, technical design discussions, and code reviews, improving release cycle speed by 25%

HSBC

Software Engineer

Pune, India

Sep 2020 – Nov 2023

- Delivered an in-house Watchlist Management System (WMS) to replace the vendor product Fircosoft Business Utilities using Java, Spring Boot, and Angular, improving maintainability, operational control, and enterprise compliance workflows
- Enhanced WMS functionalities including audit logging, deployment scheduling, and server refresh modules, improving operational efficiency and user experience
- Revamped and optimized a cross-regional data extractor, improving performance and enabling efficient data retrieval across multiple database sources
- Built RESTful web services using Spring Boot and Node.js within a microservices architecture to support scalable backend integrations
- Managed CI/CD deployments using Jenkins and Ansible, ensuring seamless integration, automation, and reliable releases
- Provided production support and system monitoring using E2 and Control-M, ensuring operational stability and timely resolution of critical issues

IIT Delhi

Project Intern

Delhi, India

2019

- Developed an underwater object detection system using depth images obtained from Microsoft Kinect V2
- Applied background subtraction and k-means clustering algorithms to remove noise and predict object trajectories from depth image data

Achievements & Certifications

- **Processathon Winner (2025)** – Built an ICE score validation feature eliminating dependency on legacy internal APIs
- **Google Cloud Associate Cloud Engineer (2024)**
- **HerHack Winner (with Google, 2023)** – Developed an AI-powered MoM platform using cloud services, Python, and Angular
- **HackForGood Participant (2023)** – Developed a language translator processing utility
- **Enterprise Engineer Program (EEP), HSBC (2023)**

Education

Banasthali Vidyapith

Bachelor of Technology in Computer Science – CGPA: 8.43

2020

Lucknow Public School

Senior and Higher Secondary (ISC) – 96%

2016
